## SEMINAR PROGRAM

11.02.02E1

### Lightning Electromagnetic Effects on Aircraft

Two Days Seminar

---

#### Seminar venue

The seminar takes place in the EMCC Seminar Center in Unterleinleiter. It is located at the EMCC Test Labs site, which among others provide aircraft EMC services. The broad area of activities can be viewed on [www.EMCC.de](http://www.EMCC.de).

The EMCC aircraft group with the associated labs are an ideal environment for the seminar. The vast experience in aircraft measurements, system and equipment testing is combined with the latest high end test infrastructure. This site is also location of design and manufacture of HIRF generators, NEMP generators and direct as well as indirect lightning generators. These meet and exceed maximum levels of current standards and specifications.

The combination of experience and infrastructure enables an experimental portion which includes demonstrations and seeing test setups. Visits and experiments are conducted in small groups. Various kind of sites are part of the course, among them are anechoic chamber, open area test site (OATS), GTEM cell, TEM cell, reverberation chamber as well as lightning test setups. Examples are provided. Discussion and questions will be part of the seminar. Seminar notes in English language are included in the fee as well as lunch and coffee breaks.

#### Contents

- Physical Phenomena
- Certification regulation and standards
- Associated Test Methods and procedures
- Aircraft, system and avionics design to reach compliance
- Visiting the EMCC test laboratories

#### Who should attend

- EMC engineers
- EMC project managers
- Certification staff
- EMC test staff
- System designers and integrators
- Equipment designers

## SEMINAR PROGRAM

### Lightning Electromagnetic Effects on Aircraft

Two Days Seminar

---

#### Day 1: Lightning Protection of Aircraft and Avionics

Welcome

Basics of Electromagnetic Compatibility  
Thundercloud Electrification and Lightning  
Lightning Interaction with Aircraft

Direct Effects of Lightning  
Indirect Effects of Lightning  
Standardised Lightning Environment, Airworthiness Regulations  
Basic Steps in Lightning Protection, Design and Certification

EMCC Labs Visit – Unterleinleiter Site  
Basic Steps in Aircraft Lightning Protection Certification

Direct Effects of Lightning  
Fuel Systems  
Indirect Effects of Lightning  
Equipment Transient Design Levels and Transient Control Levels  
Real world situations

Basic Steps in Lightning Protection Design  
Shielding, Filtering, Grounding

#### Day 2: Approach to Compliance and Test

Test Methods for Indirect Effects of Lightning  
Test Methods for Direct Effects on Structures  
Test Methods for Fuel Systems  
Test Plan/Test Procedures

Real world issues  
Discussion, questions and answers

Transfer to the EMCC Labs, Moggast Site  
Lab Visit

Practical Demonstrations  
Test Methods for Verification of Protection, Lightning Indirect Effects  
Test Methods for Verification of Protection, Lightning Direct Effects
